Mei Lin Chen

Software Engineering Intern — Summer 2026

meilin.chen@email.com (617) 163-4920 Cambridge, MA
linkedin.com/in/meilin-chen-dev

Summary

Computer Science junior at MIT (4.0 GPA, Dean's List) with 2 prior SWE internships at Microsoft and Google. At Microsoft built an internal REST API used by 500+ engineers (cut workflow time 35%); secured Google STEP → SWE Intern return offer for Summer 2026. Maintains shellmate (4,800 GitHub stars, 180K npm downloads). Strong in Python, Java, C#, and distributed systems.

Experience

Software Engineering Intern
May 2024 - Aug 2024

Microsoft — Azure DevOps Redmond, WA

- Built a REST API for internal developer tooling in C# / .NET 8; cut workflow time by 35% for 500+ engineers on the Azure DevOps team
- Shipped 4 bug fixes to the Azure DevOps platform; 2 reached production within the internship period (peer-review approval first pass on 3 of 4)
- Wrote unit + integration tests covering 95% of new code with xUnit; zero production regressions traced to my CLs in the 60 days post-deploy
- Presented the project to a 30-person engineering all-hands and earned a full-time return offer signed before the internship close
- Mentored 1 fellow Explore Microsoft intern through onboarding tooling setup and first PR landing

Software Engineering Intern (Google STEP)
Jun 2023 - Aug 2023

Google Mountain View, CA

- Developed a Python data pipeline in Apache Beam automating a weekly engineering report generation; saved 6 engineering-hours/week across the team
- Wrote internal documentation for 3 APIs in the Google Search ranking quality team; rated 4.8/5 by engineering consumers on the post-internship survey
- Cleared 11 code reviews with 97% first-pass approval rate; CLs totaled 3,100 lines of production code
- Earned Google STEP → SWE Intern return offer for Summer 2026 (1 of ~12% of STEP cohort to convert)

Undergraduate Researcher — MIT CSAIL
Sep 2023 - Present

Massachusetts Institute of Technology Cambridge, MA

- Research assistant in the MIT CSAIL Networks & Mobile Systems group; co-authoring a paper on edge-caching for ML inference workloads (target: NSDI 2026)
- Built a 14-node simulation testbed in Python + ns-3 evaluating cache-eviction policies; results referenced in 2 PhD theses-in-progress

Skills

- Python (pandas, FastAPI, asyncio)
- Java (Spring Boot, JUnit 5)
- C# / .NET 8
- TypeScript + Node.js
- SQL (PostgreSQL, Snowflake) + NoSQL (MongoDB)
- Git + GitHub Actions CI
- Data Structures & Algorithms (LeetCode Knight, 1980 rating)
- AWS Lambda + DynamoDB + S3

Languages

English	Native
Mandarin	Native

Hobbies

Reading SIGCOMM and OSDI papers

Bouldering at the MIT Z-Center

Strengths

Production Discipline

Treats internship CLs like production code — tests, design doc, and a teardown of impact at close

Side-Project Distribution

shellmate (4,800 stars + 180K downloads) shows the rare 'maintains a real-user OSS tool' signal

Education

Bachelor of Science in Computer Science (Course 6-3) — In Progress (Expected May 2026)

Sep 2022 - May 2026

Massachusetts Institute of Technology — Cambridge, MA

GPA: 4.0
